Abu Dhabi Sewerage Services Company

## ENERGY MANAGEMENT POLICY

Serial No.:	EnMSP - 001	Version No.:	000	Effective Date:	March/2019
-------------	-------------	--------------	-----	-----------------	------------

Abu Dhabi Sewerage Services Company (ADSSC) was established on 21st of June 2005, Under the resolution No 17 of 2007 issued by H.H. Sheikh Khalifa bin Zayed Al Nahyan, president of United Arab Emirates. The responsibility of ADSSC is to collect and treat waste-water discharged from all residential and commercial customers in the Emirate of Abu Dhabi and safely dispose both the solid and liquid waste.

This energy policy has been drafted in compliance with ISO 50001:2018 and is the driver for implementing and improving ADSSC's EnMS and energy performance within its scope and boundaries. ADSSC aims to provide high quality, safe and environmentally friendly wastewater services to its customers throughout the Emirate of Abu Dhabi. ADSSC is committed to the efficient, effective and economical management of its energy resources and continual improvement across its business operations, covering the collection, treatment, and disposal of end products.

ADSSC is committed to:

- Provide the necessary resources and support for implementing improvements and achieving energy management objectives and targets.
- Continually assess and review energy performance by measuring, monitoring, quantifying, analyzing and improving energy use and consumption, in comparison to the baseline.
- Continually improve energy performance by developing and reviewing energy objectives, targets and relevant Energy Performance Indicators.
- Support the purchase of energy-efficient products and services, and design for energy performance improvement
- Foster an energy management culture by increasing the knowledge and awareness of energy management across the organization and providing trainings for all relevant staff.
- Take all efforts to adhere to the applicable legal and other requirements related to energy use, consumption and management.
- Develop benchmarks and adopt best practices in the field of energy management.
- Review and update the policy as and when deemed necessary and make it available to the staff and stakeholders.
